

Unique experience based enterprise software applications. Software designed & built from the ground up with detailed business process and design input by the people that actually have to use it to conduct their jobs day in and day out. Our software applications are currently in use by State, Provincial and Municipal governments PLUS environmental - engineering firms, school boards, universities, oil companies and hospitals to name a few.

A Hosted Web based - rapid inspection, data management & reporting software solution for asbestos, lead, air quality, assets and other hazardous materials.

Access anywhere anytime... *Centralized data* - safe, secure and always backed up

**Features**

**NEW Hazmat360 Web Edition**

**Inspect, Track & Manage:**

**Asbestos (ACBM)** by homogeneous area or area surveyed (level & room), area details (design-material or component)

**Lead** by paint inspection, paint, dust and soil sample

**Other hazardous materials** including designated substances

**Air Quality** monitoring

**Waste Logs**

**Work Histories**

**Surveillances**

**Related files** including photos, PDF's, Excel and CAD files

**Floor plans** with the ability to insert linkable hotspots

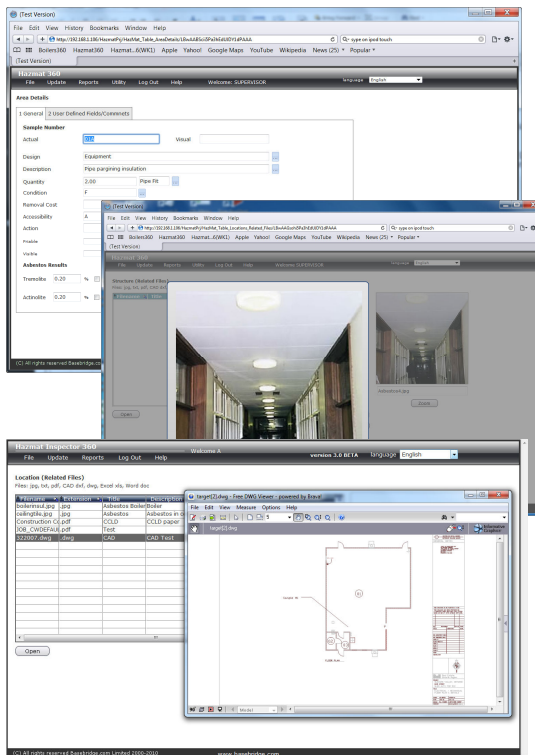

**Bulk Sample (lab results) Entry**

**Reports** including simple to use Ad-Hoc Report Wizard

**Assets** - manage assets, photos and warranty

**Completely turnkey.** No software to install all you need is an Internet connection and a browser

**We take care of everything**

**Dramatically reduce site inspection time and cost**

- Eliminate paper forms & potentially error prone redundant data entry.
- Use a notebook or tablet pc to gather all your site inspection or follow-up surveillance data.

**Value added business solution**

- Using any Internet browser your clients can quickly and easily access their critical data and the **Hazmat360** System anywhere anytime.
- You are in full control and determine who has access and to what level of access they have. Such as updating, view and print reports etc.
- White labeling available. Upload your logo and text so it looks like a service offered by your firm.

**Unlimited PC / Workstation access**

- Your firm or clients can securely access the Hazmat360 System and **centralized data** from an unlimited number of computers without individual seat license costs. All the benefits of a wide area network without the need to install configure or support.

**Consultants, Environmental & Engineering firms**

The **Hazmat360** System allows your firm to conduct on-site asbestos, lead and other hazardous material inspections-audits **dramatically** quicker and more efficiently. It is ideal for providing your clients a software solution for managing and tracking all their asbestos, lead, air monitoring and other hazardous material data. All from one easy to use system. As a value added business solution it can easily pay for itself many times over in a very short period of time. Upload your own company logo and the Hazmat360 System looks like a service offered by your firm.

**School Boards, Universities, Hospitals, Property Management firms and other companies**

The **Hazmat360** System allows you to use multiple consultants / 3rd party vendors to conduct and manage your site asbestos, lead and other hazardous material inspection data dramatically quicker and more efficiently. It is also ideal for providing your staff easy, quick access to critical data anywhere anytime.

Unique experience based enterprise software applications. ## Inspections made easy

## Products

**Hazmat 360** - Hosted web based hazardous inspection and data management system

**Boilers & Pressure Vessel**

**Elevators and Lifts**

**Welders IX**

**Boats (small vessels)**

**Exam Scheduler**

**Registered Plants**

**Power Engineers**

**LP Gas**

**Invoicing** - Receivable management for inspection, permitting and certificate fees

**Permitting and certificates**

**Time Sheets**

**Tank Track** - Home heating oil tank risk analysis and inspection priority system for insurance companies

## Configurations

**100% web based**

**Enterprise Client Server** - LAN/WAN & VPN optimized

**Mobile applications** - For smart phones, PDA's or tablet PC's

**Database back ends** include—Oracle, MS-SQL & Sybase

## Services

**Consulting**

**New application development and hosting**

**Customization of existing applications and systems**

### Multiple languages

- The Hazmat 360 System languages are English, French or Spanish.
- Other languages upon request. Simply select the language you wish the program to use from a drop down menu.

### Rapid Data Entry

- Rapid data entry page for your on-site or in house asbestos inspection data collection.
- Enter in all your data and when ready post the results into your database.
- No need to jump from screen to screen.
- Great for field data collection.

### SAP Integration

- The **Hazmat360** System can communicate with your  SAP system
- Optional—Please call for further information.

### Copy and Duplicate

- Easily copy records and all child or associated records.
- Make exact duplicate of the highlighted record with the click of a button.
- Ideal for when inspecting similar structures, areas or materials.

### MSDS (Material Safety Data Sheets)

- Upload and track all your MSDS's in one convenient spot.

### Floor - Level plan linkable hotspots

- Upload floor - level plans and insert hotspots.
- And link those hotspots to critical data.
- Provides a very quick and efficient way to view exactly what areas on your floor - level plan your hazardous materials are located.

### User management & security center

- An easy to use but very powerful user management system.
- You now have the capability to turn on and off virtually every single control in the program.
- This means you can limit a users access to rights to any button, tab, report etc.

### Provide 3rd party - client access

- Simply issue a username and password that will block all but the information you want a 3rd party vendor to see or update.
- Environmental and engineering service firms can use this feature as a value added business solution for your clients.
- School boards, Universities etc. use to control costs and monitor progress of 3rd party inspection / audits.

### Lookups - dropdown pick lists filtered to owner

- Create individual "Owner/Client" lookups - dropdown pick lists.
- Environmental and engineering service firms can use this feature to filter lookups - dropdown pick lists by client.

### Bulk lab results data entry

- Enter your sample ID lab results once.
- The **Hazmat360** System will automatically populate the results throughout the database.

### Related files-Photo, CAD, PDF, Word, Excel and Text file

- Manage and store all your photo, CAD, PDF, Word, Excel and text files in one convenient easy to access location.
- All related files available form Structures, Area Surveyed and Area Details.
