

Hazmat Inspector System[®]

Hosted Turnkey Solution that is quick and easy to use. No complicated network, wireless or web based server software to install, configure or support.

Version 4.21

Track and Manage:

Asbestos (ACBM) by homogeneous area or area surveyed (level & room), area details (design/component)

Lead by dust, paint or soil

Other hazardous materials

Air Monitoring

Waste logs

Work Histories

Surveillances

Graphics including unlimited CAD and pictures

Reports including Ad-hoc report generator. Easily create and save for future use your own reports

Handheld PDA's Ability to use a Pocket PC, Mobile 5 OS based handheld device independent of the Internet. Carry ALL historical data with you in your shirt pocket

Unlimited clients or buildings

Completely turnkey no complicated network, wireless or web based server software to install, configure or support.

We take care of everything.

1 Dramatically reduce site inspection costs

Eliminate paper forms & potentially error prone redundant data entry.

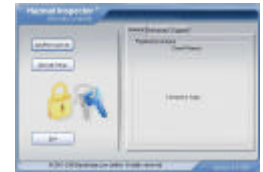

Use an inexpensive Pocket PC handheld device or pen tablet computer to gather all your site audit-inspection or follow up surveillance data. Without having to be connected to the Internet.

2 Value added business solution

Using a small **security connect** software program your clients can quickly and easily access their data and the Hazmat Inspector application anywhere anytime.

You are in full control and determine who has access and to what level of access they have. Such as updating, view and print reports only to name a few.

We can customize the security connect program with your company logo and text so it looks like a service being offered by your firm.

3 Unlimited PC / Workstation access

Your firm or clients can securely access the Hazmat Inspector software application and centralized data from an unlimited number of computers without seat license costs. All the benefits of a wide area network without the need to install configure or support complicated network, wireless or web based server software.

Means less support required on your end.

Our hazmat inspection and data management solution enables you to track and manage data for an unlimited number of buildings and clients from one central data and application source. We provide this technology as a hosted service that is an easy, powerful and cost-effective way for service and engineering firms to conduct & manage site inspection data. The hosted Hazmat Inspector turnkey solution looks and acts like a Windows application installed locally but you have access to a central data source from an unlimited number of PC / workstations anywhere anytime.

We would be happy to answer any questions you may have on how our solution can help your company become more profitable. Call toll free (800) 796-3130 in North America or email sales@basebridge.com for more information.
